Prayer Focus for the Month
The United States

"That is why a man leaves his father and mother and is united to his wife, and they become one flesh."-- Genesis 2:24

It has become a *cliché* to say that *marriage*, an institution *ordained* by *God*, is under *attack* in the United States. Even *Christian marriages* are under enormous *strain*. *During* the coming week, let *pray* for all existing *marriages* across our *country*, including those within our *church family*.

Pray that husbands will love their wives as Christ loved the church and that they will love their wives to the point where they are willing to lay down their lives for them.

"Husbands, love your wives just as Christ loved the church and gave Himself up for her ... husbands ought to love their wives as their own bodies... he feeds and cares for it, just as Christ does the church (Eph.5:25-32). Husbands love your wives and do not be harsh with them (Col.3:19). Husbands in the same way be considerate as you live with your wives and treat them with respect as the weaker partner and as heirs with you of the gracious gift of life so that nothing will hinder your prayers (1Pe.3:7)."

Pray that wives will submit to their husbands in everything as the church is submissive to Christ (Eph.5:22-24).

"Wives in the same way be submissive to your husbands so that if any of them do not believe the Word they may be won over without words by the behavior of their wives when they see the purity and reverence of your lives. Your beauty should not come from outward adornment such as braided hair and the wearing of gold jewelry and fine clothes (1Pe.3:1-3).the wife must respect her husband (Eph.5:33)."

Screening results are provided to you in 21 days. We direct all participants with abnormal results to take the report to their physician. Carotid Artery and PAD screenings help identify the presence of Atherosclerosis, and if found, can be an early warning for higher risks of stroke and coronary artery disease. Such early warning information can help you and your doctor take important steps to reduce your risk for more serious health issues. If necessary, steps may include lifestyle and diet, medical therapies, and even more thorough follow-up testing and evaluation of your heart function. Appropriate modification of risk factors (including high blood pressure, smoking, heart disease, diabetes and poor diet) is also necessary for cardiovascular disease prevention. Our screenings cannot detect all forms of stroke risk or cardiovascular disease. All tests are for screening purposes only. You should consult with your personal physician regarding your screening results.
